

Job opportunity	Senior Software Development Engineer
Geographic location	Europe / The Netherlands
Activity	Managing Technical Design
Reference	I4L-JOB-PROFILE-SDE
Type of contract	Full time

Inno4Life is an expanding company, located in Breda, the Netherlands. Our company offers a complete range of solutions in Equipment & Services, System Integration, System Optimization and independent Expert Advice in the Pharmaceutical and Bio-Tech industry. Inno4Life has a well-known international client base and a solid network of strong partners.

Inno4Life is currently looking for a Senior Software Development Engineer who feels attracted to act in a fast growing and strongly regulated international business environment, in a niche segment in the Pharmaceutical and Bio-Tech industry

Our focus is on development of new machines and equipment, optimizing existing solutions, operational excellence, and providing excellent customer services. The informal company culture is built on integrity, trust, respect and commitment. Are you the passionate professional, who can make the difference?

Profile:

As a senior software design engineer you will focus on the design and implementation of software programs for new machines or components of machines, in accordance with the functional requirements and specifications of our clients. You give advice and support to the installation and test team/customer and provide training to service engineers and end users, (customers), in using the new equipment software. You will plan and budget your own software development activities and provide support to the engineering project management team by assessing technical risks, advice on cost consequences and propose improvements on existing applications. You will responsible to prepare design documentation for the software systems and help to develop efficient processes to standardized software development activities.

Desired Skills & Expertise

The senior software developer needs 4+ years of experience in the Pharmaceutical- or Life sciences industries. Bachelor degree is a minimum requirement. Solid knowledge of PLC programming (ladder logic) Siemens and/or Allen Bradley is preferable. Servo control systems, HMI and SCADA system development, Bus systems, Profibus, Ethernet, LAN knowledge is a must, SQL knowledge would be an advantageous. Business acumen, planning and organizing are a strong advantage. Creativity, accuracy, good communication skills, being a pleasant and solid team leader /player would be considered as a plus.

Education level: Bachelor/Master

Experience level: 4+ years
