

Frankfurt June 13, 2018

Inno4Life and Systech announce extended partnership to rapidly deploy Pharmaceutical Serialisation to meet European FMD Compliance.

Inno4Life, an innovator in life science equipment solutions and Systech, the pioneer of pharmaceutical serialisation technology with over 30 years of experience, now provide an integrated turnkey serialisation solution to meet the Falsified Medicines Directive (FMD).

Together, Inno4Life and Systech are well positioned to solve the challenges with meeting pharmaceutical regulatory compliance by the February 2019 deadline.

- Visit Inno4Life at Forum 0 Stand D1 to learn about the full range of turnkey serialization equipment solutions. Inno4Life can begin taking orders for all serialization equipment including Systech serialisation software immediately.
- On display at Achema is the stand alone Item Serialisation Unit ISU3 which also can be integrated in an automated packaging line. The unique two-side option feature for printing, verifying, and tamper-evident labelling sets this unit apart from other machines, as well as its small footprint and maximum speed of 400 items per minute.

About Inno4Life

Inno4Life specializes in complex customer-specific equipment & services projects in the Life Science industries. Knowledge is deeply rooted in the automated pharmaceutical packaging business. Inno4Life offers a complete range of solutions in Equipment & Support, System Integration, System Optimization, and independent Expert Advice. Visit www.Inno4Life.com for more information.

About Systech International

Systech is a pioneer in pharmaceutical serialisation having deployed over 1,900 lines globally -- more than any other serialisation solution. Systech is the global technology leader in brand protection, anti-counterfeiting and diversion. We pioneered serialisation and are defining the future of authentication. Systech ensures safe products from the factory floor to the patients' hands. Systech deployed the world's first serialisation and aggregation project in Europe over a decade ago and has now implemented serialisation for 19 of the top 20 global pharmaceutical companies. Systech utilizes configurable vision software technology, serialisation workflow, and number management to ensure delivery of quick and cost-effective serialisation solutions to large and small pharmaceutical companies, including multinationals, regional manufacturers, and CMO/CPO's. www.systechone.com
