

Job profile

Job opportunity	Field Service Engineer
Geographic location	Europe / The Netherlands
Activity	Technical innovation
Reference	I4L-JOB-PROFILE-FSE-Jan-21
Type of contract	Temporary / permanent

You are part of:

Dec Netherlands is an expanding equipment manufacturer, located in Breda, the Netherlands. Our company offers a complete range of innovative market-leading pharmaceutical equipment solutions and services to help overcome the production challenges that our customers face. Dec Netherlands has a well-known international client base and a solid network of strong partners.

Dec Netherlands is currently looking for a Field Service Engineer who feels attracted to act in a fast growing and strongly regulated international business environment, in a niche segment in the Pharmaceutical and Bio-Tech industry.

The focus of our Service Team is on supporting the development of new equipment, optimizing existing solutions and operational excellence, and providing excellent customer services. The informal company culture is built on integrity, trust, respect and commitment. Are you enterprising, commercial and result-oriented? Then we are looking for you.

Job Description:

The Field Service Engineer is an experienced technician with a mechanical- /software- /electrical background with interest in specification, design, technical analysis, installation and testing equipment /machines for clients in the life science industries. The job involves approximately 50% domestic and 50% international travel for on-site for project implementation, troubleshooting, training, and customer support services. Are you the passionate person, who can make the difference? Then we are looking for you.

To succeed in this role, you should have the following skills and experience:

- Theoretical and/or practical experience with machine design and manufacturing;
- Interests in position measurement systems and handling systems
- PLC programming (ladder logic) Siemens step 7, TIA;
- Servo control systems / frequency drives;
- HMI and SCADA systems, Siemens WinCC
- Bus systems, Profinet, Profibus, Ethernet, LAN, Modbus, Beckhoff XTS;
- Robotics: Stäubli TX2;
- Flexible and able to work autonomously as well as in a dynamic interdisciplinary team environment;
- Communication skills;
- Stress resistance;
- Result and quality orientation;
- Planning and organizing talent;
- Team player;
- You live in the Breda area or you are willing to move.

Education level: Bachelor

Experience level: 5+ years

Languages: Dutch and English in verbal and writing

In return, we offer you:

Working in our specialization engineering means being part of an entrepreneurial and innovative organisation. We stand for quality, informal atmosphere, personal contact and lasting relationships. This is reflected in our support of our candidates and clients through:

- A culture of entrepreneurship and innovation
- High investment rate
- High-tech environment
- Collaborate with a team of motivated specialists, both inside and outside our organisation.

In addition, if you join our specialization engineering, we offer you good primary and secondary working conditions.
