Job opportunity	Project Manager
Geographic Location	Europe / The Netherlands
Activity	Managing Technical Design Machinery
Reference	I4L-JOB-PROFILE-PM-Jan-21
Type of contract	Temporary / permanent

## You are part of:

Dec Netherlands is an expanding equipment manufacturer, located in Breda, the Netherlands. Our company offers a complete range of innovative market-leading pharmaceutical equipment solutions and services to help overcome the production challenges that our customers face. Dec Netherlands has a well-known international client base and a solid network of strong partners.

Dec Netherlands is currently looking for a Project Manager who feels attracted to act in a fast growing and strongly regulated international business environment, in a niche segment in the Pharmaceutical and Bio-Tech industry.

Project Management is part of the Operations Department. The focus of the Operations Team is on development of new equipment, optimizing existing solutions, operational excellence, and providing excellent customer services. The informal company culture is built on integrity, trust, respect and commitment. Can you connect to the customer's demand and their expertise? Are you enterprising, commercial and result-oriented? Then we are looking for you.

## Job description:

The Project Manager will manage multiple projects from start to finish, taking into account; the customer requirements, the financial and technical parameters, the projected time lines and defined quality specifications.

The Project Manager will coordinate all the different disciplines in multiple project(s) and is the liaison for customers on progress, planning, costs and technical issues during the development, production, testing and installation phase. The Project Manager will coordinate deviations from planning, budget, time lines and/or specifications with functional owners and management.

## To succeed in this role, you should have the following skills and experience:

- Experience as Project Manager and/or in the Pharmaceutical and Bio-Tech industry;
- Affinity and knowledge of Engineering in equipment manufacturing;
- Commercial and financial insight and awareness;
- Project Management principles;
- People management skills;
- Communication skills;
- Stress resistance;
- Result and quality orientation;
- Planning and organizing talent;
- Team player;
- You live in the Breda area or you are willing to move.

**Education level:** Bachelor/Master

**Experience level:** 5+ years

**Languages:** Dutch and English in verbal and writing

## In return, we offer you:

Working in our specialization engineering means being part of an entrepreneurial and innovative organisation. We stand for quality, informal atmosphere, personal contact and lasting relationships. This is reflected in our support of our candidates and clients through:

- A culture of entrepreneurship and innovation
- High investment rate
- High-tech environment
- Collaborate with a team of motivated specialists, both inside and outside our organisation.

In addition, if you join our specialization engineering, we offer you good primary and secondary working conditions
