Job opportunity	Test Engineer
Geographic location	Europe / The Netherlands
Activity	Verifying and commissioning equipment
Reference	I4L-JOB-PROFILE-TE-Jan-21
Type of contract	Temporary / permanent

## You are part of:

Dec Netherlands is an expanding equipment manufacturer, located in Breda, the Netherlands. Our company offers a complete range of innovative market-leading pharmaceutical equipment solutions and services to help overcome the production challenges that our customers face. Dec Netherlands has a well-known international client base and a solid network of strong partners.

Dec Netherlands is currently looking for a Test Engineer who feels attracted to act in a fast growing and strongly regulated international business environment, in a niche segment in the Pharmaceutical and Bio-Tech industry.

Test engineering is part of the Operations Department. The focus of the Operations Team is on development of new equipment, optimizing existing solutions, operational excellence, and providing excellent customer services. The informal company culture is built on integrity, trust, respect and commitment. Can you connect the customer's demand and their expertise? Are you enterprising, commercial and result-oriented? Then we are looking for you.

## Job Description:

The Test Engineer is involved in specification, design, technical analysis, integration, and test execution of equipment and service solutions in Pharmaceutical- or Life Sciences industries. The Test Engineer will prepare the documentation and will document the test results. Configuring, trouble shooting and follow up on remedial actions. During installation the Test Engineer will manage the installation and commissioning of the equipment on site and will support our customers during invalidation (IQ/OQ/PQ).

The job involves working at our customer's site for short periods and to travel abroad (domestic and international) occasionally.

## To succeed in this role, you should have the following skills and experience:

- Knowledge on PLC/PC controlled production equipment, industrial printers, vision systems
- Computers & tools: Word, Excel, Power Point, Databases, data loggers, measuring devices
- Theoretical and/or practical experience with mechatronic machine design, position measurement systems, industrial printers, vision systems, PLC's, robots, clean rooms etc.
- Accurate worker, documenting according to GDP (Good Documentation Practice)
- Experienced in a multidisciplinary project environment;
- Self-motivated, self-supporting and pro-active;
- Communication Skills;
- Stress resistance;
- Result and quality orientated;
- Planning and organizing talent;
- Team player.
- You live in the Breda area or you are willing to move.

**Education level:** Bachelor/Master degree in electrical/mechanical/mechatronic engineering

**Experience level:** 5+ years

**Languages:** Dutch and English in verbal and writing

## In return, we offer you:

Working in our specialization engineering means being part of an entrepreneurial and innovative organisation. We stand for quality, informal atmosphere, personal contact and lasting relationships. This is reflected in our support of our candidates and clients through:

- A culture of entrepreneurship and innovation
- High investment rate
- High-tech environment
- Collaborate with a team of specialists, both inside and outside our organisation.

## Job profile

In addition, if you join our specialization engineering, we offer you good primary and secondary working conditions.
