

Job opportunity	<b>Project Engineer</b>
Geographic location	Europe / The Netherlands
Activity	Project Engineering/Management
Reference	I4L-JOB-PROFILE <PE>
Type of contract	Temporary / Long term

**Project Engineer**

Accountable for project engineering quality in all project phases including: Initiation & Analysis, Design & Configuration and Implementation.

Work closely with Project Managers, Field Engineers, customers, and OEMs during the project lifecycle.

**Client deliverables:**

- Responsible for verification of line evaluation in Sales phase and quoted scope of work and deliverables
- Responsible for timely delivery of design documentation, drawings, configuration documents and configuration archives
- Utilize baselines and Standard Engineering Packages as the starting point for all project engineering work on all projects (new and predecessor projects)
- Document deliverables to promote creation of new standards
- Deliver client education on product and project direction
- Design, install, configure, troubleshoot and validate performance of product against project deliverables
- Travel for project support, including face to face client meetings, design reviews, and site surveys.
- Deliver and/or assure the accuracy of project engineering contents
- Support project through all project phases
- Participate in project team meetings and conversations with customers to communicate the technical deliverables for projects

**Internal activity:**

- Follow I4L Project Execution Methodology, working on functional teams with Project Managers and Field Engineers
- Utilize proper Project Engineering methods, and comply with all SOP's
- Prioritize workload daily, manage timelines and deadlines for PE deliverables, and provide status updates to Project Managers
- Provide timely escalations for resource, timeline, and/or scope conflicts to immediate manager, ensuring minimal impact to project deliverables
- Handover the engineering content to the Field Engineer through a transition meeting by walking through the project engineering package

**Professional philosophy:**

- Promote a client-focused philosophy and act as a trusted technical advisor for clients
- Gain customer trust through open and transparent discussion

**Experience level:**

- Typical relevant experience 2 – 4 years
- Other significant experience requirements
- Knowledgeable in serialization and a wide range of packaging industry equipment and automation products

### **Desired Skills & Expertise**

- Proficient in Windows platforms such as XP and Windows Server and deep knowledge of networking devices and PCs
- Experience with machine vision or inspection systems
- Working knowledge of electrical wiring and experience with using AutoCAD
- Experience with PLCs on Packaging Equipment and process logic preferred
- Knowledgeable in MS SQL, Access or other relevant database environment
- Efficient at using hardware and software troubleshooting tools
- Experience with Visual Basic or other structured event based programming language.

### **Travel Requirements:**

- Approximately 25% both domestically and internationally.

### **Languages:**

- Proficiency in English language and preferably French or German.

The above job description is not intended to be an all-inclusive list of duties and standards of the position. Incumbents will follow any other instructions, and perform any other related duties, as assigned by their supervisor.
