Job opportunity	Chief Engineer
Geographic location	Europe / The Netherlands
Activity	Managing Technical Design Machinery
Reference	I4L-JOB-PROFILE-CE-Jan-21
Type of contract	Temporary / permanent

You are part of:

Dec Netherlands is an expanding equipment manufacturer, located in Breda, the Netherlands. Our company offers a complete range of innovative market-leading pharmaceutical equipment solutions and services to help overcome the production challenges that our customers face. Dec Netherlands has a well-known international client base and a solid network of strong partners.

Dec Netherlands is currently looking for a Chief Engineer who feels attracted to act in a fast growing and strongly regulated international business environment, in a niche segment in the Pharmaceutical and Bio-Tech industry.

Engineering is part of the Operations Department. The focus of Operations Team is on development of new equipment, optimizing the quality of our internal processes, managing costs, and providing fast and excellent products and services to our customers. The informal company culture is built on integrity, trust, respect and commitment. Are you enterprising, have a thorough technical background and result-oriented? Then we are looking for you.

Job Description:

The Chief Engineer will manage the process of designing complex equipment and machines in accordance with the requirements and specifications of clients in the Pharmaceutical and Bio-Tech industry and will support the (senior) project engineers in efficiently accomplishing the projects.

To succeed in this role, you should have the following skills and experiences:

- Define technical requirements in cooperation with the senior and project engineers;
- Support the Project Manager in defining and implementing project plans for specific project teams;
- Manage the design processes of the assigned projects;
- Manage and coach the senior-, and project engineers and giving instructions and specific tasks;
- Monitor and check the validity and functionality of the final design, taking into account the functional specifications, quality and costs;
- Report on progress design process and propose improvements on efficiency and quality of products and processes;
- Maintain contacts and coordinate the activities and planning with the engineers at different levels in the project teams and other parts of the organization.
- Know-how of design and/or mechanical engineering;
- In depth knowledge and experience in design processes;
- Knowledge of test procedures
- Experience in managing complex technical projects;
- Able to manage multiple projects;
- People management skills;
- Communication skills;
- Stress resistance;
- Result and quality orientation;
- Planning and organizing talent;
- Team player;
- You live in the Breda area or you are willing to move.

Education level: Bachelor/Master

Experience level: 5+ years

Languages: Dutch and English in verbal and writing

In return, we offer you:

Working in our specialization engineering means being part of an entrepreneurial and innovative organisation. We stand for quality, informal atmosphere, personal contact and lasting relationships. This is reflected in our support of our candidates and clients through:

Job profile

- A culture of entrepreneurship and innovation
- High investment rate
- High-tech environment
- Collaborate with a team of motivated specialists, both inside and outside our organisation.

In addition, if you join our specialization engineering, we offer you good primary and secondary working conditions.
