

Systech International and Inno4Life Launch Faster, Fully-Integrated Pharmaceutical Serialisation Solution to help meet the European Falsified Medicines Directive (FMD)

PRINCETON, NJ and BREDA, the Netherlands (September 25, 2017) - [Systech International](#), the pioneer of pharmaceutical serialisation technology with over 30 years of experience and [Inno4Life](#), innovator in life science equipment solutions, are together solving the challenges with meeting pharmaceutical regulatory compliance.

Inno4Life is launching the [ISU3 Item Serialization Unit 3](#), the hardware component of the complete [Systech UniSolve™](#) solution. With the ISU3, pharmaceutical cartons can be supplied manually to the standalone unit or automatically when the unit is integrated in an automated packaging line. The unique two-side option feature for printing, verifying, and tamper-evident labelling sets this unit apart from other machines, as well as its small footprint and maximum speed of 400 items per minute.

"Both companies have successfully collaborated to support the packaging and [serialisation](#) needs of clients across Europe. To rapidly respond to FMD regulatory deadlines, the ISU3 is available with flexible and scalable pre-configured Systech [serialisation](#) software," says Alastair Taylor, Director of European Sales at Systech.

- The new serialisation solution will be showcased at the [Processing and Packaging Machinery Association \(PPMA\)](#) event, 26-28 September, in Birmingham UK. To schedule a demonstration at Stand C14 visit: <http://www.systechone.com/events/>
- Both companies will begin taking orders for the ISU3 and UniSolve beginning October 1, 2017.

The machine introduction is prompted by customer demand to meet FMD deadlines. European governments are enacting complex regulations that place substantial pressure on pharmaceutical manufacturers. "The serialisation of licensed drug products will be a legal requirement for companies in the EU starting in 2019," says Giel van Veen, Business Development Director at Inno4Life.

About Systech International

[Systech](#) is the pioneer and world leader in serialization having deployed over 1,600 lines globally -- more than any other serialisation solution. Systech's partner network stands ready to assist companies in meeting their country's regulatory deadline and is a preferred solution provider trusted by the top pharmaceutical companies worldwide.

About Inno4Life

[Inno4Life](#) specializes in complex customer-specific equipment & services projects in the Life Science industries. Knowledge is deeply rooted in the automated pharmaceutical packaging business. Inno4Life offers a complete range of solutions in Equipment & Support, System Integration, System Optimization, and independent Expert Advice.
